

## Mapp (tidl Webtrekk) - Enhancement #4641

### Reserveringer i APP?

11/28/2019 10:59 AM - Tue Gaston

<b>Status:</b>	Needs prioritization	<b>Estimated time:</b>	0.00 hour

<b>Category:</b>			
<b>Target version:</b>			

#### Description

Det ser slet ikke ud til at reserveringer registreres i app'en:

The screenshot shows the Power BI interface for the 'ddb\_biblioteket app'. The left-hand navigation pane is visible, with 'Event Parameter' and 'Reserver' highlighted in green and circled in red. The main report area displays a table with the header 'Reserver' and 'Qty Reserver'. The table content shows 'No rows to display', which is circled in red. Other elements in the report area, such as '100% of visitors' and the date range '2019-10-21 - 2019-11-17', are also circled in red.

#### History

##### #1 - 11/28/2019 11:13 AM - Tue Gaston

- Tracker changed from Bug to Enhancement
- Status changed from 31 to Needs prioritization
- Assignee changed from Michael Ødum to Morten Maegaard Astrup

##### #2 - 11/28/2019 11:14 AM - Tue Gaston

Det er fordi MWA'erne aldrig er blevet implementeret i APP'en.  
Det er et økonomisk spørgsmål, og endelig afklaring udestår stadig.
